ABSTRACT:

PROBLEM TO BE SOLVED: To prepare a program capable of receiving only the contents of a home page for the i-mode of a portable telephone at the time of receiving the same home page by the i-mode of the portable telephone and receiving also the contents of a conventional personal computer(PC) in addition to the contents of the home page for the i-mode of the portable telephone at the time of receiving the contents by a PC.

SOLUTION: A program capable of neglecting operation in the i-mode of NTT

DoCoMo and permitting the PC to execute the operation is described.
